BOHNING PRO-STAFF SHOOTER: Adriana Armstrong

BOHNING YOUTH ARCHERY SCHOOLS AND CLUBS PROGRAM

Over our 75+ year history, Bohning has supported youth archery programs across the US and internationally. We hope to inspire lifelong interest in the sport of archery, whether that is through target archery or hunting.

We love to partner with Archery Clubs, Schools, and College Programs to promote fun, safe, and responsible habits in our youngest participants of the sport we all enjoy.

WHAT WE ARE OFFERING:

- Bohning will supply each approved youth archery club/school a 42.5% discount off retail pricing on all Bohning products purchased through the club. Members of your club can receive this same discount with proof of club membership.
- Special Packages designed for Youth or Collegiate Programs.
- Support for any questions or concerns regarding our products.
- A Bohning banner to hang at your club.
- A FREE welcome package that includes Bohning Youth Archery stickers, and one our top-of-the-line fletching jigs.
- Availability of custom vanes, wraps, and decals.

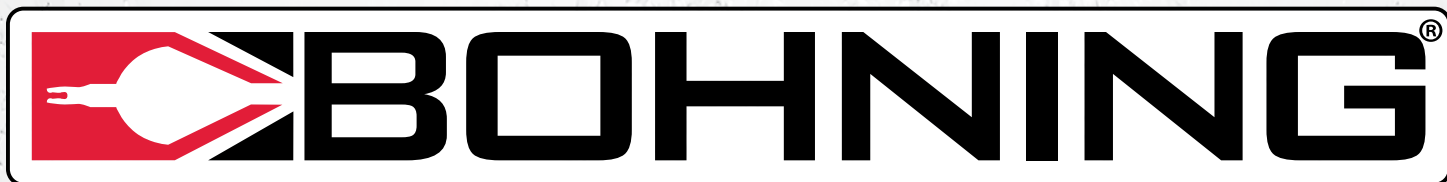

WHAT WE WOULD LIKE FROM YOU:

- The club must complete Youth Archery Club or Collegiate Archery Program Application.
- Send us a picture of the members of your club (preferably in front of our banner once you receive it).
- Notification of events and wins your club has so we can promote you through our social media.
- Send images at least 2 times annually of events, practices, tournaments, club members or students (see application regarding photo releases).

We welcome you to fill out our online Archery Club Application. If you have any questions, please feel free email us at info@bohning.com or call us at 231-229-4247.

Visit www.bohning.com for additional information and application.

PAGE 39

YOU SEE THEM! THEY CANT SEE YOU!

CoverTech™ HD Window Camo is a must for your manufactured or home-built hunting stand windows. It hides you from what you're hunting while still giving you a clear line of site to your target. You can see them but they can't see you.

CoverTech has a high definition printed/patterned front, with a black micro-perforated window film backing giving you one way vision graphics. CoverTech also has a clear adhesive and can be removed.

PROTECT AND LUBRICATE ALL ZIPPERS AND SNAPS

ZIP-SNAP™ is a natural product that will help protect and lubricate all zippers and snaps.

Apply ZipSnap to any zipper or snap to ensure smooth and effortless use. ZipSnap is waterproof, odorless, and will keep your zippers from freezing. ZipSnap will also keep metal zippers from rusting or corroding.

Our mess-free applicator makes using Zip-Snap on every zipper and snap you own easy.

Available in singles or in a Fishbowl for countertop display.

① INCLUDED: Crossbow Bolt Receiver/Adapter

Part #: 601004

PRO CLASS JIG

- Capable of 3 or 4 fletch (4 at 90° apart)
- Fits all shaft sizes
- Adjustable offset on vanes or feathers up to 5.5" (140mm) long

1348 — Straight
1349 — Right Wing
1350 — Left Wing

⑦ WILL FLETCH FEATHERS

MADE IN USA

THIS JIG WILL:

- 3 Fletch**
(120°/120°/120°)
- 4 Fletch Standard**
(90°/90°/90°/90°)

🎯 **PRO TIP:**

HELICALS AND OFFSETS ARE THE SAME THING!

Manufacturers use different ways of classifying helicals and offsets, which can be confusing when making comparisons. First of all, let's clarify that helicals and offsets are essentially the same thing. A helical is defined as any vane angle that is not a 0° straight fletch. An offset is, quite simply, a minor helical and usually refers to anything between 0° and 2°. A vane that is fletched at greater than 2° appears more twisted due to the way it wraps around the shaft, however, a vane fletched at less than 2° still has a helical "twist", it is just less noticeable.

PRO CLASS PARTS

1351 — Straight
1352 — Right Wing
1353 — Left Wing
601020 — 1" (25mm) Vane
 Fletching Clamp - Griffin Vane
601021 — 2" (50mm) Vane
 Fletching Clamp - Griffin Vane
601004 - Crossbow Receiver/Adapter

① OPTIONAL: Crossbow Bolt Receiver/Adapter

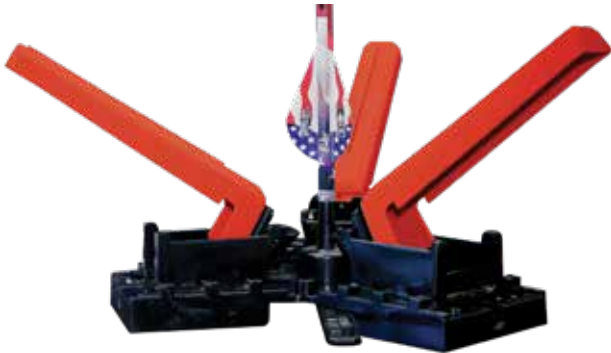

FLETCHING JIGS

MADE IN

TOWER® JIGS

Tower jigs fletch 3 vanes at once and apply more pressure than standard jigs. One base with interchangeable arm options for feathers, plastic vanes, or mylar vanes.

- Capable of fletching 1° to 3° right, 1° to 3° left, or straight
- Fletch all 3 vanes at once with precise 120° spacing
- Applies even pressure along the entire vane base
- Great for single or multiple vane repairs too!

601027 - COMPLETE TOWER®

- Great for clubs and families
- All the Tower® Jig components in one purchase

12963 - TRIPLE TOWER®

- Arms: Straight, 3° Right, 1° Right
- Center Posts: F Nock, A nock, HE, Standard, Swedged Nock, Pin Nock

12962 - HELIX TOWER®

- Arms: 3° Left & 3° Right
- Center Posts: F Nock, A nock, HE, Standard, Crossbow, Pin Nock

601010 - FEATHER TOWER®

- Arms: 2° Right, 2° Left
- Center Posts: F Nock, Standard, Swedged Nock

601001 - CROSSBOW TOWER®

- Arms: Straight, 1° Right, 3° Right
- Center Posts: Crossbow, Swedged Nock

601035 - MYLAR TOWER®

- Arms: Mylar Vane - Straight
- Center Posts: F Nock, Standard, Pin Nock

COLOR OF ARMS	TYPE OF FLETCHING	OFFSET/ HELICAL	MAX LENGTH OF FLETCHING	REPLACEMENT PART #

© PRO TIP: INSPECTING YOUR NOCK

The smallest crack in your nock can lead to a major failure on your next shot. Just like your arrow shaft, it is important to inspect your nock before every shot. Nock damage often occurs at the target when arrows come into contact with each other. For example, you may graze one of your arrows, creating a tiny crack in the shoulder of your nock. From that crack, other minuscule cracks may be radiating deep into the nock, potentially propagating into a major fracture the next time the arrow is shot. This could harm you and damage your equipment. When in doubt, replace the nock.

PRO TIP:

To install glue in points use Ferr-L-Tite for aluminum arrows and Ferr-L-Tite Cool Flex for carbon or carbon hybrid arrows.

WAXES

SEAL-TITE®

- Silicone-based bowstring wax
- Odorless and waterproof
- Box container made from 100% recycled plastic
- Vegan

1360 — 0.92 oz tube
(28 grams)

1360Box — 1 box 1.41 oz
(40 grams)

BULK OPTIONS:

1631 — 24 tubes
1631BOWL - Bowl and 24pk
35001 — 250 tubes
3500 — 500 tubes

1631Box — 24 boxes
35001Box — 250 boxes
3500Box — 500 boxes

TEX-TITE®

- Natural-based bowstring wax
- Waterproof
- Industry standard for over 70 years
- Box container made from 100% recycled plastic

1306 — 0.92 oz tube
(28 grams)

1306Box — 1 box 1.41 oz
(40 grams)

BULK OPTIONS:

1630 — 24 tubes
1630BOWL - Bowl and 24pk
32001 — 250 tubes
3200 — 500 tubes

1630Box — 24 boxes
32001Box — 250 boxes
3200Box — 500 boxes

XCCELERATOR WAX®

- Softens at a low temperature
- Odorless and waterproof
- Fast saturation
- Reduces friction on slides, wheels and rollers
- Vegan

1365 — 0.51 oz tube
(14.5 grams)

BULK OPTIONS:

1634 — 16 tubes
1634BOWL - Bowl and 16 pk
1365-250 - 250 tubes

STRING SHIELD®

- Silicone-based liquid wax
- Sponge-top applicator
- Odorless and waterproof
- Vegan

301019 — 1.18 oz tube
(35 ml)

BULK OPTIONS:

301019-16 - 16 tubes
301019BOWL - Bowl & 16 pk
301019-250 - 250 tubes

PRO TIP:
STRING SHIELD'S™
liquid formula
penetrates fibers of
individual strands
on string.

NEW

ZIP SNAP®

ZipSnap is a natural product that will help protect and lubricate all zippers and snaps.

301028 — 0.39 oz tube
(11.0 grams)

BULK OPTIONS:

301028-24 - 24 tubes
301028BOWL - Bowl & 24pk
301028-250 - 250 tubes

PRO TIP:

OTHER USES FOR SEAL-TITE® and TEX-TITE®

- Apply to nock shank on press-fit nocks for easier insertion and indexing.
- Apply to pin bushings for easier installation and indexing of tight-fitting pin nocks.
- Apply to point and broadhead threads to keep them from loosening and to help prevent rust.

PRO TIP:

SEAL-TITE® and TEX-TITE® are available in convenient and simple to use drop side boxes for the easiest bow string wax application on the market.
No more wax melting out of a tube and all over your bow case and expensive equipment.

BOWSTRING WAX APPLICATION:

SEAL-TITE	TEX-TITE	XCCELERATOR WAX	STRING SHIELD	SEAL-TITE BOX - TEX-TITE BOX
STEP 1 (ALL WAXES): Start with a clean string: using a rag dipped in warm water, or by wrapping a serving thread around the string and moving it up and down, remove dirt and old wax.				
SEAL-TITE	TEX-TITE	XCCELERATOR WAX	STRING SHIELD	SEAL-TITE BOX - TEX-TITE BOX
STEP 2: Warm the tube of wax by rolling it between your hands. Remove the lid and push or twist the bottom to move the wax up in the tube. Apply wax liberally to bowstrings. Rub wax into the string fibers briskly using your fingers or a leather strip - as wax warms, it melts into the string fibers.			Step 2: Apply thin coat to bowstring using the foam applicator	Step 2: Lower the sides of the applicator box and apply wax liberally to bowstrings. Rub wax into string fibers using your fingers or leather strip - as the wax warms, it melts into the string fibers

FLETCH-TITE PLATINUM®

- Solvent-based glue designed for vanes, feathers and swedged nocks
- Works on carbon, aluminum, wood, fiberglass, wraps and painted shafts
- Clamp time 5 minutes, cure time 24-48 hours
- The archery industry's most flexible and durable glue
- If you have a pint, quart, or gallon of Platinum that has thickened, try Bohning's Platinum Thinner on page 53
- Industry standard for over 75 years

1301 — 3/4 oz Tube (22.1ml)

BULK OPTIONS:

301040 — 40 pk

301030 — 200 pk

301006EQ — 6 pk*

301040EQ — 40 pk*

301030EQ — 200 pk*

All come in clamshell package

1356 — Pint (473.1 ml)

1357 — Quart (946.4 ml)

1358 — Gallon (3.79 l)

*Packed to meet "Excepted Quantities" International ocean and air transportation requirements in order to reduce dangerous goods fees.

WARNING: Cancer and Reproductive Harm.
www.P65Warnings.ca.gov.

FLETCH FUSE™

- Instant glue designed for vanes, points, inserts and swedged nocks
- Works on all shaft types
- Clamp time 30 seconds, cure time 2 hours
- Budget-friendly

301025 — 1/2 oz Bottle (17.2 ml)

BULK OPTIONS

301025-24 - 24 Bottles

301025BOWL - Bowl and 24 pk

INSERT IRON™

- Designed for points and inserts
- Works on all shaft types
- 48 hour cure time (72 hours if air is dry)

1317 — 1 oz Bottle (29.6 ml)

BLAZER BOND®

- Instant glue designed for vanes, points, inserts and swedged nocks
- Works on all shaft types
- Clamp time 20 seconds, cure time 2 hours
- Use a very thin bead or several dots spread out for best adhesion
- Works well in humid conditions

301015 — 1/2 oz Bottle (17.2 ml)

301016 — 1 oz Bottle (29.6 ml)

REGULAR

DELUXE

DISPENSER BOTTLES

- 2 oz (59.1 ml) bottle for use with Fletch-Tite Platinum
- Deluxe bottle has a smaller opening for easier/cleaner application

1303 — Regular

1304 — 6 pk regular (red) replacement nozzles and caps

13031 — Deluxe

13032 — 6 pk deluxe (white) replacement nozzles and caps

CHOOSE YOUR ADHESIVE

NAME	APPLICATIONS	SHAFT TYPE	CLAMP TIME	CURE TIME (before using arrow)
FLETCH-TITE PLATINUM	Vanes Feathers Swedged nocks	Carbon Cedar Aluminum Fiberglass Wraps Painted	5 Minutes	Minimum: 24 hours 48 hours is best

USEFUL INFORMATION:

- Flexible (non-brittle) bond - absorbs shock when shooting into a target repeatedly
- Does not crack or become brittle.
- Along with other applications, use this glue on tip and tail of vanes or feathers for added security.
- Easy jig clean-up - simply scrape glue off. Do not use knife or any sharp instruments
- Best in low humidity applications.
- Two year expiration on unopened tubes.
- Do NOT store solvent-based adhesives in the refrigerator.

NAME	APPLICATIONS	SHAFT TYPE	CLAMP TIME	CURE TIME (before using arrow)
BLAZER® BOND**	Vanes Points Inserts Outserts Swedged nocks	Carbon Cedar Aluminum Fiberglass Wraps Painted	20 Seconds	2 Hours

USEFUL INFORMATION:

- Fastest curing time.
- Instant, rigid-bonding glue.
- Medium viscosity (Bohning's most liquid CA glue).
- Begins curing on contact.
- Best for high humidity application.
- One year expiration on unopened tubes.

** All Cyanoacrylate (CA) glues may leave white marks on the shaft. Carefully use acetone to wipe this off, use discretion around wraps and inks

NAME	APPLICATIONS	SHAFT TYPE	CLAMP TIME	CURE TIME (before using arrow)
FLETCH FUSE**	Vanes Points Inserts Outserts Swedged nocks	Carbon Cedar Aluminum Fiberglass Wraps Painted	30 Seconds	2 Hours

USEFUL INFORMATION:

- Instant, rigid-bonding glue
- Medium viscosity (thicker than Blazer Bond)
- Begins curing on contact
- Best for high humidity application
- One year expiration on unopened tubes

** All Cyanoacrylate (CA) glues may leave white marks on the shaft. Carefully use acetone to wipe this off, use discretion around wraps and inks

NAME	APPLICATIONS	SHAFT TYPE	CLAMP TIME	CURE TIME (before using arrow)
INSERT IRON	Points Inserts Outserts	Carbon Cedar Aluminum Fiberglass	n/a	48 Hours (72 Hours if air is dry)

USEFUL INFORMATION:

- Strongest glue.
- Insert Iron expands when curing. Hold point or insert in place while curing
- Cures with moisture - best when applied in humid conditions
- One year expiration on unopened bottles
- Do NOT store in the refrigerator

ADHESIVES

HOT MELT ADHESIVES

FERR-L-TITE®

FOR USE WITH ALUMINUM ARROW

- Designed for points and inserts
- Recommended for wood and aluminum shafts
- Not for carbon shafts
- Heat-reversible on aluminum shafts—high temperature required
- Melting point of 350° F (176.7° C)
- Industry standard for 75 years

1309 — 12 Gram Stick

BULK OPTIONS:

1339 — 1 lb. Brick (453.6 g)

1633 — 16 Sticks (Bulk)

31001 — 250 Sticks (Bulk)

COOL FLEX®

FOR USE WITH CARBON ARROW

- Designed for points, inserts and bushings
- Recommended for carbon, aluminum and fiberglass shafts
- Fully cured when it reaches room temperature
- Use hot water for adjustment, replacement or removal
- Melting point of 280° F (137.8° C)

1308 — 12 Gram Stick

BULK OPTIONS:

1368 — 1 lb. Brick (453.6 g)

13081 — 16 Sticks (Bulk)

13082 — 250 Sticks (Bulk)

ALCOHOL BURNER

- Ideal for installation of hot melt adhesives
- Fill with denatured alcohol (not included)
- Holds 4 oz (118.3 ml)

1315 — Burner

1316 — Replacement wick

CHOOSE YOUR ADHESIVE

NAME	APPLICATIONS	SHAFT TYPE	CLAMP TIME	CURE TIME (before using arrow)
FERR-L-TITE	Points Inserts Outserts	Cedar Aluminum	n/a	As soon as it has reached room temperature (approx. 5 minutes)
USEFUL INFORMATION: • Hot melt adhesive. • Heat reversible on aluminum shafts - flame required • No expiration.				

NAME	APPLICATIONS	SHAFT TYPE	CLAMP TIME	CURE TIME (before using arrow)
COOL FLEX	Points Inserts Outserts Pin Bushings	Carbon Aluminum Fiberglass	N/A	As soon as it has reached room temperature (approx. 5 minutes)
USEFUL INFORMATION: • Hot melt adhesive (low melt) • Heat reversible - Hot water required • No expiration.				

PREMIUM FLETCHING TAPE

- Designed for feathers and mylar vanes
- Works on all shaft types
- Length 60' (18.3m), width 0.188" (4.8mm)
- Machine-cut without lubricant so no dead zones in the roll
- One roll fletches approximately 40 arrows with 5" (127 mm) feathers

1649 - 60' Fletching Tape

FLETCHING TAPE DISPENSER

- Easily apply tape to feathers and mylar vanes
- Keeps tape free of dust and debris
- Refillable; includes 1 roll of premium fletching tape
- Screw holes for easy mounting

801099 - Tape Dispenser

NAME	APPLICATIONS	SHAFT TYPE	CLAMP TIME	CURE TIME (before using arrow)
FLETCHING TAPE	Feathers Mylar Vanes	All	N/A	Immediate
USEFUL INFORMATION • Pressure sensitive adhesive • No expiration • Do not store in direct sunlight				

PRO TIP:

CHOOSING AN ADHESIVE

When choosing an adhesive, it is always best practice to choose one that has been tested and proven to work best for your application. Bohning adhesives have been tested over thousands of fletches, nocks and inserts. For the best performance of your adhesives, be aware of several factors that may affect adhesion, including: humidity, application, and time required for cure.

BASIC FLETCHING INSTRUCTIONS:

NOTE: For All Bohning Vanes - Do not clean base of vane or use Primer Pen. All Bohning vanes are double pre-primed at the factory. No additional cleaning or priming is recommended.

1. Make sure that jig is correctly set up so that the clamp/arm seats firmly to the shaft for the entire length of the vane. Test this by dry fitting shaft and vane in jig without glue.
2. Place vane at the desired height in the clamp/arm to get desired distance from the nock.
3. For Fletch-Tite Platinum apply adhesive over the entire vane base. For Blazer Bond and Fletch-Fuse apply several dots of adhesive along the vane base and then use the tip of the bottle to spread the adhesive along the length of the base.
4. Clamp the vane in the jig for 5 minutes for Fletch-Tite Platinum, 20 seconds for Blazer Bond and 30 seconds for Fletch-Fuse.
5. Carefully remove arrow from the jig and allow Fletch-Tite Platinum to cure for 24-48 hours, Blazer Bond and Fletch-Fuse for 2 hours before use.

ADHESION TROUBLE-SHOOTING:

The best prevention for adhesion problems is to properly clean your arrows using Bohning SSR Powder. ****DO NOT** clean Bohning Vanes.

Follow the correct clamp and cure time for the adhesive that you are using.

Make sure your fletching area and hands are free from spray lubricants, dust, pet hair, greasy food, chemicals or aerosol sprays.

Use the correct amount of adhesive based on the adhesive type.

Clean your jig frequently. For Bohning jigs, a short soak of the arm/clamp/insert in acetone will remove excessive adhesive.

Never use a knife to scrape off excess glue! This will cause damage to the jig.

IDENTIFYING FLETCHING ADHESION PROBLEMS:

If fletching fails with adhesive remaining on the shaft but not on the fletch, this indicates an incompatibility between the adhesive and the fletch. Ensure the adhesive you have chosen is the correct choice for your fletch.

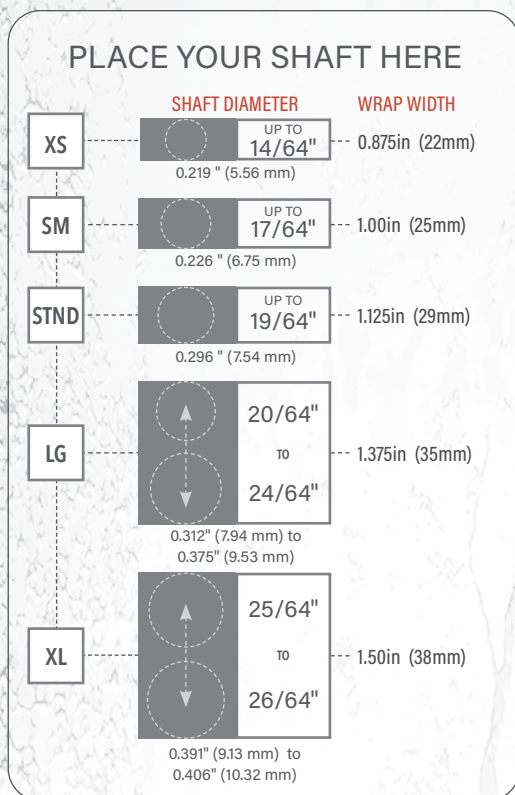

If the fletching fails with adhesive remaining on the vanes but not the shaft, this would indicate a problem with the arrow shaft. Start by cleaning the arrow shaft using the Bohning SSR Powder, making sure to rough up the shaft surface and then rinse with hot water and allow to dry.

If the fletching fails with the adhesive remaining on both the vane and the shaft, this could indicate a setup problem with the jig, a damaged clamp, inadequate adhesive curing or a possible contamination on the shaft or vanes.

- 1 = HIGH DEFINITION MATERIAL
- 2 = NEON MATERIAL
- 3 = SOLID COLOR MATERIAL
- 4 = REFLECTIVE MATERIAL

PRO TIP:

Applying arrow wraps: Ensure your hands are clean and free of contaminants that may adversely affect adhesion. Remove wrap from backing, placing wrap adhesive side up on a mouse pad or other semi-soft surface. Align shaft with the edge of the wrap and roll with steady motion and downward pressure. Once wrap is applied, roll the arrow between your hands to fully activate the adhesive. Place the index fletching over the wrap seam to help secure the wrap.

WRAP AROUND NUMBER DECAL

- 16 sets of numbers 1-12
- Fits arrows up to standard diameter : 19/64" / 0.296" (7.54mm)

501012WA - Number Decals

PRO TIP:

Excellent way to identify the best arrows in a set

VISI-WRAP

- 3 sets of 12 highly reflective decal wraps
- Fits arrows up to standard diameter: 19/64" / 0.296" (7.54mm)

501018BL — Bohning Logo
501018TS — Tiger

PRO TIP:

Great way to find arrows in poor lighting conditions

Bohning supports many archery initiatives throughout the world including youth archery, archery tournaments, archery organizations and many charities.

In 2024, Bohning will be taking a portion of the sales from the following projects and donating it to a local charity. If you want to help support these wonderful organizations please consider buying one of the following products. We will announce the

organization we will donate to in December of 2024.

If you have an organization you would like to support contact us, we can work with you to produce custom stickers, wraps, and vanes.

VANES

VANE MATERIAL, WHICH IS BETTER?

There is a lot of discussion on the type of vane material used in vane manufacturing today. At Bohning, we have two distinct vane materials for all of our vanes, AR1000 and AR1250. There are advantages to each.

The AR1000 is our original vane material that has been used on some of our most popular vanes of all time, like the Blazer. This material is our most durable, and forgiving, and will give you the most choices when deciding what glues to use to attach your vanes to your arrows. You can use either solvent-based glues like Platinum or instant glues like Blazer Bond.

The AR1250 vane material is ultra stiff and many people will tell you they are the quietest vanes on the market. We recommend them for long distance shooting and for use in high-speed bows and crossbows. Vanes made out of AR1250 MUST use instant style glues for maximum adhesion. Solvent-based glues are not recommended for this material.

Every Bohning vane produced, in either material, is pre-primed and ready to adhere to your arrow. No cleaning or priming is needed, or wanted. Just clean your arrow and they will stick! #bohningvanesstick

WHICH WILL YOU CHOOSE?

NO PRIMER PEN IS NEEDED
FOR ANY BOHNING VANE! WE
DOUBLE-PRIME ALL OF OUR
VANES AT THE FACTORY.

WHAT VANE SHOULD I USE?

With all the Bohning vane styles available, it is sometimes difficult to decide which is the best for you. Bohning offers 20+ unique vane styles and profiles. We have created the table below to help you in your decision making. Our recommendations are based on aerodynamic properties of each vane and the arrow diameter used in the event listed. Keep in mind not everyone uses the same set-ups so the following should be used as a general guideline. Feel free to try out vanes for what you feel will work for your specific set-up. The choice is up to you! All Bohning vanes are the highest quality and come from our factory in Northern Michigan pre-primed twice, so there is no need to do anything to the vane prior to fletching them. All of our vanes are extensively tested for their specific uses and durability.

BOHNING VANE USAGE TABLE

PRO TIP: The Blazer vane has the perfect combination of the ability to steer an arrow, durability, and adhesion. This vane allows you to switch from your target point to a broadhead with no adjustments needed. This vane is built from our original AR1000 material which offers the highest level of durability and adhesion of any of our vanes. These are the reasons this vane is the **#1 sold vane in the world** and has been since 2005.

AR1000 Vane Material
Durable - Best Adhesion - Best Selling Vane Material Ever

PRO TIP: The Black Sky 2.0 vane is designed with high-speed bows and crossbows in mind. It has the same legendary profile as the Blazer vane but is manufactured with our ultra-stiff AR1250 material. This combination will give you unmatched ability to steer an arrow while being more rigid and quieter in flight. Try this vane out in your high-speed compound or crossbow and see for yourself why this is quickly becoming one of the most popular vanes we produce.

BLACK SKY 2.0

- Blazer Vane profile
- Stiffer and quieter AR1250 vane material
- Ideal for high-speed rail-less crossbows
- All Bohning Vanes are pre-primed. No vane prep needed.

AR1250 Vane Material

Ultra Stiff - Quiet - Best for Long Distance & High Speed

PRO TIP: The Heat vane is designed for bows that require a lower profile vane. It has the same surface area as our Blazer vane but is only 0.44" (11.3mm) high. This allows you to shoot this vane out of bows or rests that have lower clearance levels. This vane is perfect, 3-fletched, to steer a mechanical broadhead or 4-fletched with a fixed-blade broadhead. The AR1250 material and low profile make this one of the quietest vanes on the market.

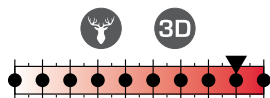

HEAT VANE

- Made out of the ultra-stiff AR1250 vane material for maximum arrow stabilization, arrow control, and quiet flight
- All Bohning Vanes are pre-primed. No vane prep needed.

AR1250 Vane Material

Ultra Stiff - Quiet - Best for Long Distance & High Speed

PRO TIP: The X Vane line is produced using AR1000 material and all of the lengths of profile are shield cut. This vane line has been extremely popular with target archers and hunters for over 20 years. The 3.5" and 3.0" vanes are perfect for steering a fixed blade broadhead or steering a crossbow bolt over long distances. The shorter length X-Vanes are recommended for use on small diameter arrows and excel in 3D and FITA/Field Events. The 3.0" X Vane is also Bohning's recommendation for Youth Archery set ups.

X VANE®

- Made of AR1000 vane material
- All Bohning Vanes are pre-primed. No vane prep needed.

AR1000 Vane Material

Durable - Best Adhesion - Best Selling Vane Material Ever

PRO TIP: This year we have expanded our X3 line to include all of the profiles available in the X Vane line. The X3 line is made of AR1250 material which makes it perfect for high speed bows and crossbows. The AR1250 is our ultra-stiff material which makes it a quiet vane. The 3.0" X3 vane is Bohning's recommendation for fletching crossbow bolts if you do not have the clearance to use a Blazer or Black Sky 2.0.

YOUTH ARCHERY

🎯 **PRO TIP:** Archery is a game of inches. Give your youth archer the best chance for consistency and repetition with Bohning's jigs and vanes. Bohning's Fletching jigs and adhesives will make fletching and re-fletching easy and repeatable. The Bohning 3" X Vane is Bohning's recommendation for all youth tournament competitors, including NASP® and S3DA®. The X Vane is made with Bohning's exclusive AR1000 material which is soft enough not to affect simple arrow rests, and is pre-primed for easy installation and maximum adhesion.

NEW

YOUTH COACH TOOL KIT

Everything a coach needs to fletch and refletch youth arrow. We have included our 3-vane advanced fletching jig, the Cauldron. We also include our best-in-class Strip Pro vane and wrap remover along with SSR which cleans oils and adhesives from your arrow to ensure the best possible adhesion of vanes. We include our bow square for bow set-up, and Ferr-L-Tite to attach points, and 1 oz Blazer Bond to attach vanes. With this package you will be ready for the season!

- Cauldron Student Edition (1.5 degree right insert only)
- Strip Pro
- Bottle of SSR
- Bow Square
- Ferr-L-Tite Hot Melt
- Blazer Bond 1oz

🎯 **PRO TIP:**
The Cauldron Jig fletches 3 vanes at once with perfect indexing.

COACHKIT - Youth Coach Tool Kit

YOUTH/PARENTS TOOL KIT

Everything a youth archer or parent needs to fletch and refletch youth arrows. We have included compact, foldable fletching jig, the Frontier Jig. We also include our best-in-class Strip Pro vane and wrap remover along with SSR which cleans oils and adhesives from your arrow to ensure the best possible adhesion of vanes. We include Ferr-L-Tite attach points and 0.5 oz Fletch Fuse to attach your vanes. With this package any parent or youth archer can fletch or repair their own arrow!

- Frontier Student Edition (1.5 degree right insert only) (Easy to use)
- Strip Pro
- Bottle of SSR
- Ferr-L-Tite Hot Melt
- Fletch Fuse 0.5 oz

🎯 **PRO TIP:**
The Frontier Jig fletches 1 vane at a time but folds flat for easy re-fletching at tournaments.

PARENTKIT - Youth/Parent Tool Kit

🎯 **PRO TIP:**

Want to have custom vanes and wraps for your youth archery team? Contact us for more information!
info@bohning.com

🎯 **PRO TIP:**

Want an easy fundraising project for your team? See our Arrow Pen Kits on Page 41.

YOUTH ARCHERY

X VANE®

After extensive testing Bohning is recommending the 3" X Vane for youth archery set-ups. Fletched at 1.5 degree this vane will fly true even at low speeds. The AR1000 material is soft enough to not damage rests and is resilient enough to perform for a complete season.

- Complies with all NASP® rules.
- All Bohning Vanes are pre-primed. No vane prep needed.
- Available in 17 colors

10771 — 36 pk
10772 — 100 pk
10773 — 1000 pk

802060	Peep It Pro Set Screw Tool

PRO TIP: WHAT IS A CLARIFIER?

A clarifier lens is used in your peep when using a magnification lens in your front sight. This "clears up" the target while minimizing the fuzziness on the pin at full draw giving you the sharpest site picture possible.

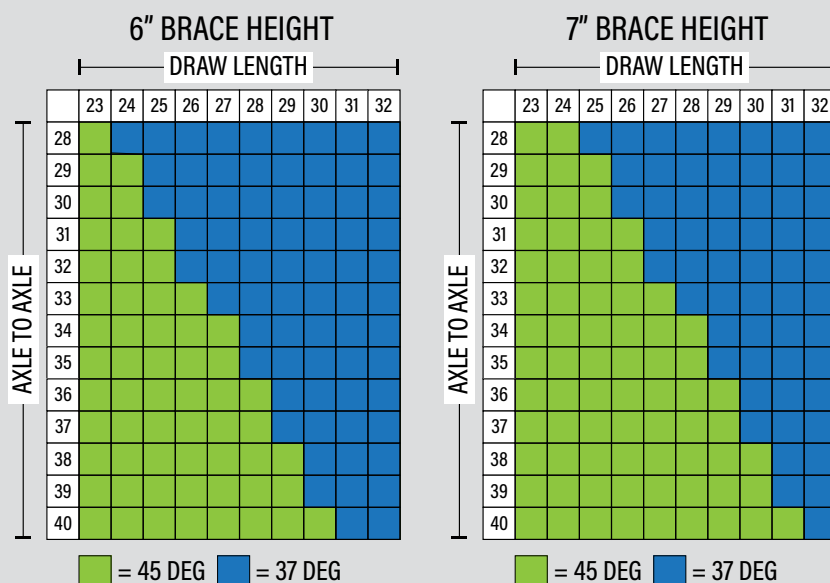

PRO TIP:
Average Weight for an assembled Peep-It Pro is 26 grains (1.7 grams)

STRING ACCESSORIES

NEW

SOFT-FLEX KISSER BUTTON

The new Soft-Flex Kisser button by Bohning is a split ring design that is made out of a durable yet flexible material that is comfortable to shoot. You do not need to remove your string to set the kisser button up. The softer material helps eliminate string noise and vibration. Available in a variety of colors to match your bow.

- Helps maintain a consistent anchor point every shot
- Flexible yet durable material. 0.5" (12.7 mm) diameter
- Split design for easy installation with 2 enclosed clips

1665 — Kisser w/ clips

**MADE IN
USA**

KISSER BUTTON

- Helps maintain a consistent anchor point every shot
- Lightweight and durable, 0.5" (12.7 mm) diameter
- Easy installation with 2 enclosed clips

1664 — Kisser w/ clips
801081 — 100 pk

"SLIM" PEEP

- Durable, high-impact and lightweight
- 3/16" (4.7 mm) sight orifice, small profile for easy installation
- Individual peeps include 12" (30.5 cm) tubing, bulk peeps do not

1668 — Peep with tube
1640 — 50 pk (peep only)
1641 — 50 pk (tube only)
1' pieces (305mm)

STRING WHISKERS

- Two pieces per package, 4.5" (11.4 cm) long each
- Dampens string noise and oscillations with round whiskers
- Easy to use
- Ties to bowstring

1051 — 1Pair
1635 — 50 Pair

PRO TIP:

String Whiskers reduce vibration in your bow's string, reducing the noise created when shooting your bow. They can also be used as a way to judge wind speed and direction!

TOOLS

THE STRIP-PRO

- Strips your arrow shaft of all fletchings, glue and arrow wrap
- New and improved handle for better grip/ease of use.
- Safe for all arrows/diameters
- Extra blade storage in Handle
- Replacement blades available

MADE IN
USA

1524 — Strip-Pro

801026 — Blades: 3pk

SSR

- Concentrated cleaning powder removes dirt, grease, residue and contaminants
- For carbon, aluminum and fiberglass shafts
- Use on a scour pad with hot water to scrub, then rinse

801052 — Single-use pk - 1 tsp (4.9 ml)

801053 — Shaker bottle - 2.65 oz (78.4 ml)

🎯 PRO TIP

TO REMOVE FLETCHINGS:

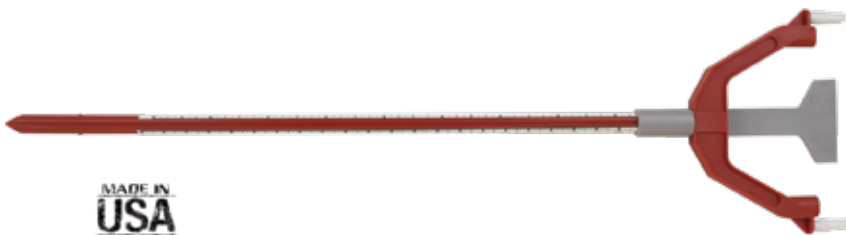

Use the "Strip-Pro" by Bohning to strip the fletchings from arrow shafts. Clean with SSR powder on a scour pad to prepare for new fletching.

🎯 PRO TIP:

3 WAYS TO REMOVE WRAPS:

1. Use the "Strip-Pro" to remove the wrap.
2. Use a hair dryer to soften the adhesive and peel the wrap.
3. Use boiling water to soak the wrapped arrow shafts in and peel the wrap off once softened.

To remove remaining wrap adhesive, use SSR powder on a scour pad in hot water to scrub off.

MADE IN
USA

BOW SQUARE

- No more having to guess or clip and unclip the bow square continuously to ensure the loop is in the correct place! Simply slide the indicator back and forth as need to start and finish your D-loop or nock sets.
- Easy to read brace height measurements
- Use your own nocks for the most accurate fit possible
- Use the flat side to check cam lean of your bow

CROWN DIPPING AND CRESTING

Bohning offers many options for this purpose, ranging from clearcoats to white or colors, in both solvent-based and water-based finishes. Bohning offers water-based Crest-Lac paint, which is very low odor, easy to thin to your desired consistency using distilled water, and is easy to clean up.

Bohning's Fletch-Lac paint is the original solvent-based arrow paint, it is time tested, covers all arrow surfaces extremely well with minimal coats, and thins well with Bohning Fletch-Lac Thinner.

Crown dipping for both Fletch-Lac and Crest-Lac paint, follow the steps below for the best arrow finish:

1. Clean arrow shaft.
 - a. For wooden arrows, sand and then wipe with a tack cloth.
 - b. For Carbon or Aluminum arrows, scrub shaft surface with Bohning SSR powder on a scour pad, scrubbing in a single direction, rinse with hot tap water and then stand upright until fully air dry.
2. Pour paint into dip tube making sure to adjust the viscosity (thickness) with the correct thinner for the paint that you are using. Stir paint, allow to sit for 20 minutes, pop any surface bubbles in the paint.
3. Hang arrows using the Bohning Arrow hanger.
4. Plug hollow arrows with Bohning Dip'n Plug ring.
5. Dip arrows to the desired depth in the paint, pull out of paint until paint starts to drip, then dip the arrows back into paint. Allow the paint to stream off the shafts until it is just dripping and then hang to dry over a surface that can collect the excess paint.
6. Allow paint to dry completely before coating with another paint or clearcoat. If coating with another paint, it is recommended that you lightly sand the painted surface of the shaft and then wipe with a tack cloth.
7. Pour leftover paint back into cans to save for the next round of arrows.

Cresting for both Fletch-Lac and Crest-Lac paint.

1. Clean arrow shaft.
 - a. For wooden arrows, sand and then wipe with a tack cloth.
 - b. For carbon or aluminum arrows, scrub the shaft surface with Bohning SSR powder and a dish scour pad, scrubbing in a single direction, rinse with hot tap water and then stand upright until fully air dry.
 - c. For Dipped/Painted arrow shafts: Wipe dipped/painted end of shaft with a tack cloth.
2. Mix desired paints. Determine your desired cresting pattern.
3. Place arrow onto the Bohning Crester, making sure to put the nock end tight against the arrow stop.
4. Proceed with cresting the arrow. Leave the crester spinning with the arrow in place until the paint is dry.
5. If a clearcoat top coat is desired for the arrow, using Crest-Lac clear is strongly recommended as it will not dissolve the cresting lines.

For unfinished wooden arrows, a finish is essential for the entire arrow shaft.

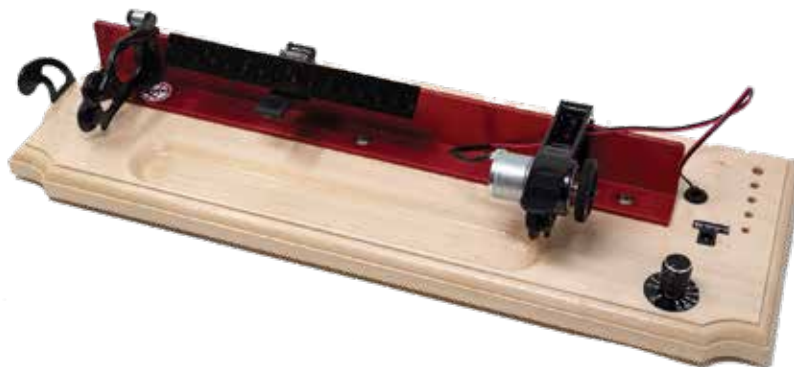

TRADITIONAL

PROFESSIONAL CRESTING KIT

- The kit includes:
 - One crester (made with maple base)
 - Six 1 oz jars of Crest-Lac paint: black, red, yellow, blue, silver, and gold
 - Four paint brushes:
 - Hairline, 1/8" (3.18 mm), 1/4" (6.35 mm) and 1/2" (12.7 mm)
- Adjustable arrow rotation speed of 130-440 RPM
- Ruler with English and metric doubles as pattern rest
- Carbon-brush motor that is quiet and durable
- International versions come with international power supplies that accept 110 or 220V

801083 — Cresting Kit

801084 — Crester Only

DIP KIT

- Includes:
 - 1 glass dip tube
 - 1 arrow hanger
 - 2 pints (946 ml) of white Crest-Lac
 - 2 pints (946 ml) of clear Crest-Lac
 - 3 Dip n' Plug rings
- Dip tube holds up to four arrows at a time
- Tube accommodates up to 11" (28 cm) crown dip

801094 — Dip Kit

801085 — Cresting Kit and Dip Kit Combo

801095 — Dip Tube

801098 — Arrow Hanger

801100 — Dip'n Plug Ring

TRADITIONAL

FLETCH-LAC

- Industry standard for over 75 years — top choice of custom arrow shops worldwide!
- Solvent-based crestring paints that dry to a hard, chip-resistant finish
- Ground transport only
- Thin with Fletch-Lac Thinner
- Dries on all shafts in less than 24 hours
- Improves fletching adhesion

1412 — 1 oz Jar (17.2 ml)
 1105 — Pint (473.1 ml)
 1106 — Quart (946.4 ml)
 1107 — Gallon (3.79 l)

GLOSS COLOR CHOICES

FLORESCENT COLOR CHOICES

METALLIC COLOR CHOICES

MATTE color

PRO TIP:
 Fletch-Lac:
 If thinning is desired,
 use Fletch-Lac Thinner
 sold on pg 50

CREST-LAC

- Acrylic water-based paint (no VOC)
- Dries to a glossy, extremely hard layer on any shaft in 24-36 hours (based on humidity in drying area)
- Improves fletching adhesion

301011 — 1 oz Jar (17.2 ml)
 301014 — Pint (473.1 ml)
 301012 — Quart (946.4 ml)
 301013 — Gallon (3.79 l)

clear

PRO TIP:
 Crest-Lac
 If thinning is desired,
 use distilled water **NOT**
 paint thinner

TRADITIONAL

FLETCH-LAC SEALANTS

CLEAR & BLUE CLEAR

- Wood shaft seal coat or base dip to maximize adhesion
- Blue Clear produces sharper, brighter colors when dipped over white
- Not recommended for dipping over crested arrows

1124 — BC/CL Pint (473 ml)

1125 — BC/CL Quart (946.4)

1126 — BC/CL Gallon (3.79 l)

SUPERCOAT

- Single coat wood shaft seal
- Cures to a hard protective finish
- Not recommended for dipping over crested arrows

1120 — Supercoat Pint (473 ml)

1121 — Supercoat Quart (946.4)

1122 — Supercoat Gallon (3.79 l)

🎯 **PRO TIP:**

- All Bohning clearcoats can be used to seal wooden arrows.
- DO NOT apply Fletch-Lac Clearcoat, Blue Clear, or Supercoat on top of cresting.
- All clearcoats can be used over white crown-dipped arrows.
- Always allow the first coat of paint to dry before applying another.
- Clearcoat and Blue Clear are the same formula and thickness.
- Clearcoat and Blue Clear will seal arrows.
- Blue Clear has an additional bluing agent added to it.
- Bluing is added to make what is underneath it brighter/whiter.
- Supercoat is not much thicker but leaves a slightly thicker more protective film behind when dry.
- Supercoat is applied the same as the others and dries in a similar time.

All Bohning Clearcoats can be used interchangeably.

FLETCH-LAC THINNER

- For use with all Fletch-Lac products
- Not for use with adhesives or Crest-Lac products

1131 — Pint (473 mL)

1132 — Quart (946.4mL)

1133 — Gallon (3.79 L)

FEATHER-DRI

- Protect your feather fletchings from the weather
- Colorless, odorless, water-repellent powder

**SOLVENT BASED
FAST DRYING
HIGH IMPACT**

**DESIGNED FOR PAINTING LURES
TESTED FOR FRESH AND SALT WATER**

Lure-Lac paint is a fast drying lacquer with high impact, flexible polymers that bond to a variety of surfaces including lead and lead-free jigs, plastic lure bodies, metal lures and spoons, wood lure bodies and cork.

Lure-Lac has been formulated for salt water and fresh water use. It has been shown to be resistant to salt water exposure equal to 24 hours a day for an entire year. Lure-Lac is easily applied with either an air brush or dipping by thinning with Lure-Lac Thinner. Dry to the touch in about 10 minutes!
